

## REMARKS

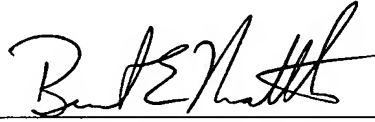

By the foregoing amendments, the specification has been revised to provide a cross-reference to the international application and appropriate headings. In addition, editorial changes to the specification have been made. New claims 26-45 are presented which generally correspond to the claims as amended during the international phase, but have been rewritten to omit multiple dependencies and to better conform the claims to U.S. format. The claims as amended during the international phase are reflected in the Annex to the International Preliminary Examination Report.

The filing fee has been calculated based on the claims as amended above. No new matter has been added.

Respectfully submitted,

MARSHALL, GERSTEIN & BORUN LLP
